and improve livestock productivity. However, ethical and environmental considerations regarding GM crops must be carefully evaluated. 3. Discuss the impact of climate change on agricultural practices in the Caribbean. Climate change increases the frequency and intensity of extreme weather events: droughts, floods, hurricanes impacting crop yields and livestock production. Adaptation strategies include drought-resistant crop varieties, improved water management and diversification of agricultural systems. 4. How can integrated pest management (IPM) contribute to sustainable agriculture? IPM prioritizes preventive measures and minimizes the use of synthetic pesticides. It utilizes a combination of biological control, cultural practices and targeted pesticide application only when necessary, reducing environmental harm and promoting biodiversity. 5. What are the key economic challenges facing Caribbean agriculture and how can they be addressed? Challenges include limited access to finance, fluctuating market prices post harvest, losses and competition from imported agricultural products. Addressing these requires investment in infrastructure, improved market access, value addition and government policies that support local farmers.
