this book looks at the relationship between the structure of the sentence and the organization of
discourse while a sentence obeys specific grammatical rules the coherence of a discourse is instead
dependent on the relations between the sentences it contains in this volume leading syntacticians
semanticists and philosophers examine the nature of these relations where they come from and how
they apply chapters in part i address points of sentence grammar in different languages including
mood and tense in spanish definite determiners in french and bulgarian and the influence of
aktionsart on the acquisition of tense by english french and chinese children part ii looks at modes of

discourse showing for example how discourse relations create implicatures and how indirect discourse differs from free indirect discourse the studies conclude that the relations between sentences that make a discourse coherent are already encoded in sentence grammar and that once established these relations influence the meaning of individual sentences

this book complements and extends the edexcel gcse modular mathematics examples and practice book for intermediate stage 2

this text provides additional excercises written to complement those in the edexcel gcse mathematics course textbooks answers to all the questions are provided allowing students to self test the higher text is targeted towards higher ability students
