the world water problems are a due to bad governance not to physical water scarcity  
this book is inspired by this statement and explores whether it holds in a specific  
country spain where climatic conditions spain is one of the most arid countries of the  
european union would fully justify saying that water problems are due to physical  
water scarcity the metrification of water uses and their monetary value is a first  
important step in understanding how reallocation of water among users could help  
mitigating many of current water problems in spain however water reallocation  
among users or from users to nature is far from simple initiatives portrayed as the

solution to the water governance jigsaw e.g water trade improved water use efficiency users collective action public participation are not free of difficulties and shortcomings the book explores the growing need for maintaining spain s natural capital and the human component of water governance people s needs wishes vested interests aspirations that often determine the result of decisions and sometimes lead water management to a deadlock this book takes a step forward in showing a more complex and also closer to reality picture of water governance in spain

these records of the intellectual property conference of stockholm 1967 contain all the official documents in relation to the conference which were issued before and during the conference by official documents is meant documents which were published by the united international bureaux for the protection of intellectual property birpi either in their capacity of organizer of the conference in some cases jointly with the swedish government or in their capacity of secretariat of the conference

essays and personal reflections from former and current cedaw committee members on discrimination against women

agroecological footprints are a unique and popular concept for sustainable food system measuring and keeping a tab on the agroecological footprints of various human activities has gained remarkable interest in the past decade from a range of human activities food production and agriculture are most essential as well as extremely dependent on the agroecosystems it is therefore crucial to understand the interaction of agroecosystem constituents with the extensive agricultural practices the environmental impact measured in terms of agroecological footprints for a healthy for the sustainable food system the editors critically examine the status of agroecological footprints and how it can be maintained within sustainable limits drawing upon research and examples from around the world the book is offering an up to date account and insight into how agroecology can be implemented as a solution in the form of eco friendly practices that would boost up the production curbs the environmental impacts improves the bio capacity and reduces the agroecological footprints it further discusses the changing status of the agroecological footprints and the growth of other footprint tools and types such as land water carbon nitrogen etc this book will be of interest to teachers researchers government planners climate change scientists capacity builders and policymakers also the book serves as additional reading material for undergraduate and graduate students of agriculture agroforestry agroecology soil science and environmental sciences national and international agricultural scientists policymakers will also find this to be useful to achieve the sustainable development goals
